# Powered by the Microsoft Azure Cloud Platform, IDS Next's SkyRes Application Gives Users Complete Control of Their Hotel Chain's Reservation Process

MICROSOFT AZURE APP BUILDER PROFILE: IDS Next Business Solutions Pvt. Ltd

We are a global leader in the domain of hospitality technology solutions. We provide hotel PMS and other solutions to large independent hotels, chain hotels, resorts, boutique hotels, midsize hotels, and budget hotels in South Asia, Southeast Asia, the Middle East, and Africa. Built on Microsoft Azure, SkyRes efficiently centralizes reservation- and inventory-related data.

WHAT WE OFFER

Implemented at the chain hotel's central reservation office (CRO), SkyRes centralizes and organizes reservation, guest, and inventory-related data in one place for easy access and management. SkyRes takes advantage of several Microsoft Azure services, including Azure Virtual Machines, to manage the chain hotel's central database.

SkyRes enables central reservation system (CRS) agents to accept bookings for multiple properties at once. CRS agents can capture guest information once, then proceed with the itinerary booking for FIT reservations and group reservations. Using Azure ensures 99.9 percent uptime for the SkyRes application.

SkyRes provides the ultimate platform to receive bookings from across the globe. It allows the chain hotel's CRO to assign travel agents, corporate offices, and sales offices separate log-ins to receive bookings based on allocation. Built on Azure, the SkyRes application automatically scales with traffic to meet changing demands.

SkyRes enables CRS agents to send a unique link to guests to make online payments against their reservations. This can also be linked to the reservations in an itinerary booking. Azure's flexible storage options allow us to store files and images in a secure cloud environment, ensuring easy access in the SkyRes application.

WHAT OUR CUSTOMERS ARE SAYING

"SkyRes is implemented at our three properties, helping us view real-time hotel inventory at the CRO. It also allows us to accept multi-property bookings quickly and easily." – Kunal Gupta, Associate Director, Sales & Marketing – MRS Hotels, India

Microsoft | Go-To-Market Services

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
